

# LEARNER

*perspective* workbook

The learner perspective asks you to examine your practice and delivery from the point of view of your learners. It includes the expectations, requirements and participation of learners in the process.

The eLearning guidelines have been developed to assist the tertiary sector in its engagement with eLearning. The eLearning guidelines are intended for teachers, managers, organisational leaders and quality assurance bodies and offer thoughtful prompts for good practice to consider when engaging with technology-supported teaching and learning.

The learner perspective offers reflective prompts focussed on the learner experience, where you examine your practice and provision from the point of view of your learners. They are designed to be considered contextually within a tertiary organisation. The eLearning guidelines – Learner Perspective Workbook is designed to support practical engagement with the eLg, for note taking, review discussions and organisational planning. This document is one component and may be used in partnership with the eLearning guidelines for alternative perspectives and eLearning guidelines resources.
